DETAILED ACTION

Remarks

This Office action is responsive to applicant's amendment filed on April 30, 2007.

Claims 1, 4-8 and 10 are pending, of which claims 8-10 are newly submitted.

Drawings

The drawings filed on September 26, 2003 are accepted by the examiner.

Specification

The disclosure is objected to because of the following informalities:

1. On page 8 at line 13, it is suggested to change "stet" to --set--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The rejection of claim 10 under 35 U.S.C. 112, second paragraph has been withdrawn.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 4-6, 8 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the

Application/Control Number: 10/670,508

Art Unit: 1745

relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 1 and 6 have been amended to recite that the control means has a table of voltage-current characteristics of the fuel cell stack during start-up....¹ This limitation is considered new matter. No portion of the disclosure, either in the specification or the drawings, conveys any teaching drawn to a table of voltage-current characteristics. The closest teaching as it appears to the examiner is Figure 3, however, this Figure merely discloses a line graph of voltage as a function of current. The examiner additionally notes that in submitting the present amendment, applicant did not provide page and/or line citations to the original disclosure in support thereof.

Page 3

Claim Rejections - 35 USC § 102 and 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

¹ The examiner notes that claim 6 has the exact limitation as in claim 1, although it appears to the examiner that the amended portion of the claim was not submitted in underlined form as otherwise required.

Application/Control Number: 10/670,508

Art Unit: 1745

Claims 1, 4-8 and 10 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ding et al. (U.S. Pat. 6,580,977 B2).

The rejection is maintained for the reasons of record. Notwithstanding the 35 U.S.C. 112, first paragraph rejection (discussed above) for the amended limitation drawn to a table of voltage-current characteristics, the examiner notes that the amendment to independent claims 1, 6 and 7 appears to incorporate the prior limitations of dependent claims 2 and 3 (now canceled). This amendment calls for interruption of the reduction of the electric power level. In col. 7 line 46 to col. 8 line 2, Ding et al. teaches numerous instances where the reduction of the electric power level supplied from the secondary battery is interrupted. See, for example, the teaching in col. 7 line 54 et seq., "If $P_{req} > P_1$, the strategy issues a command 146 to use the FCS 44 as load following and the battery 54 to provide power assistance (such as to meet a power deficiency) until SOC drops to SOCb2." (emphasis added) Thus, it is clear that in employing the battery to provide power assistance, its prior reduction of supplied power is interrupted.

Applicant's sole argument—that Ding et al. does not teach or suggest the features of the present amendment, has been fully considered but is not found persuasive for the foregoing reasons.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian Mercado whose telephone number is (571) 272-1289. The examiner can normally be reached on Monday through Friday.

Art Unit: 1745

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (571) 272-1292. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
